

dsseries Dye-sublimation photo printers

Mobile, fast and especially user-friendly, the Fotolusio DS40 and DS80 printers have all the skills required to meet the new demands of digital photography. In a store or on a reporting job, the DS **multi-size** Series adapts itself to all kind of situations for remarkable results in terms of printing quality and productivity (8.7 seconds for a 10 x 15 print; 35 seconds for a 20 x 30 print). You can take your DS80 or DS40 wherever you need it.

User-friendly and efficient

Enter a new dimension of quality, speed and mobility!
The result of 25 years' experience in thermal printing, the DS Series is THE dye-sublimation printing solution best-suited to the requirements of modern digital photography. **Easily transportable** and equipped with a system to protect paper from dust during printing, the Fotolusio DS40 and DS80 printers open up new prospects for all photography professionals looking for mobile printing solutions.

Main advantages

- Extremely compact: reduced footprint (32 x 36 x 17 cm) for optimum installation at the point of sale. Considerable saving in space.
- Mobility: low weight (14 kg), half that of a traditional thermal printer, for easy transportation.
- High printing speed: less than 10 seconds for the first 10 x 15 print, and subsequent prints in 8.7 seconds (DS40). 35 seconds for a 20x30 (DS80). True high speed!
- Great rendering: high quality picture, smooth and regular gradations, highly natural flesh tones, deep blacks.
- Simplicity: ultra-fast front loading system for the paper and ink ribbon. Accessible to anybody without training.
- Multi-size: from 9 x 13 to 15 x 23 (DS40) and from 20 x 10 to 20 x 30 (DS80).
- High Resolution: 3 choices of speed/printing quality: 300 x 300, 300 x 600, 600 x 600 dpi.
- Modularity: possible connection between several DS Series printers. Ideal for points of sale requiring high productivity in a reduced space. By combining several DS40 and/or DS80, it is possible to process a 10 x 15 print every 2.5 seconds and obtain 10 different print sizes.
- Autonomy: from 110 to 400 photos according to sizes.
- Professional environment: functional printer driver.
- Multimedia: Embedded USB 2.0 connection for the computer interface and rapid download of pictures.

An infinitely exquisite rendering

Thanks to the IC thermal controller (DPPS1) and the thermal head produced by the most advanced technologies, all shades of color are taken into consideration in all circumstances. The ultra fast dye-sublimation photo printers DS40 and DS80 have simply overturned traditional printing habits. Producing very high quality prints (virtually equivalent to silver halide prints) at high speed, they are also fitted with an exclusive system that protects paper from exposure to dust during printing. The result is incredible quality and definition. **Whatever the user's special requirement (reporting, portraits, ID pictures, weddings, minilab use, industrial photography, etc.), the DS40 and DS80 can adapt to it, and work wonders.**

About DNP Photo Imaging Europe

Since October 2007, DNP Photo Imaging Europe, a subsidiary of Japanese giant DNP, has become a new force for innovation and distribution in the European photo world. Based in France, DNP Photo Imaging Europe is in charge of the distribution of DNP products and services in 40 European and Mediterranean countries. With one of the most complete range of consumables in the market, DNP Photo Imaging Europe has developed comprehensive solutions covering the needs of thermal sublimation printing and those of traditional photofinishing (minilab and industrial laboratory).

Bolstered by its range of products, DNP Photo Imaging Europe intends to play a major part in the evolution of the photo print market. With innovative solutions at the technical level as well as for financing installations, DNP Photo Imaging Europe brings a new dynamic to distribution networks in their approach to photo printing. <http://www.dnpphoto.eu>
